

Consolidation of potential questions for Working Groups

- 1) What are the most significant obstacles to effective IA/IG/MN coordination?
- 2) Is the lack of a common communication method for describing the diverse, but overlapping responsibilities for intergovernmental organizations the main impediment to smooth integration and coordination?
- 3) Is the willingness to share information with other organizations a larger barrier to coordination than which communication method is used?
- 4) Is "unity of effort" the primary effect sought through IA/IG/MN coordination?
- 5) How does your organization typically communicate with external organizations about what needs to be done to accomplish your own or collective missions/objectives/goals?
- 6) How should cooperation be accomplished?
- 7) What do people within agencies/organizations need to know in order to cooperate?
- 8) What role do you see training and education play in the creation and adoption of a common method for: communicating roles and tasks? Overcoming other barriers to smooth integration and coordination?
- 9) If you were "king for a day," what actions or initiatives would you take to advance IA/IG/MN cooperation?
